EXPERIENCE SUMMARY

- Around 16+ years in the entire system life cycle, including Project Management, System Analysis, Design, Programming, Debugging & Implementation and Maintenance of various applications.
- Around 10+ years of experience in Web Technologies such as .NET Core, Microservice, ASP.NET, ASP.NET with MVC 4.0, Angular, jQuery, JavaScript, Json, ADO.NET, LINQ to SQL, Web API, MS Azure, Kafka, RMQ, Quartz, KOB, Docker Container, Python, Graph-API, NServiceBus, AWS, Ajax, SSRS, SSIS. Experience in source control tools like TFS and GIT LAB and experience in agile processes.
- Good understanding of Software Development Life Cycle (SDLC), Agile Methodologies, SCRUM and Development Environments
- Strong knowledge and experience in Angular 16.0, Web API and micro services Experience in source control tools like GIT.
- Proficient in database skills such as MS SQL Server – Database Design, Normalization, Queries, Stored Procedures, Cursors, Triggers, Job Creation and Functions.
- Handled major releases and performed peer review of code
- Training candidates on Project flows, coding standards, SonarQuebe, CheckMarx, TDD, BDD, Exception Management, Extreme Programming.
- Possess good analytical and problem-solving skills
- Excellent communication skills, good organizational skills, self-motivated, positive attitude, ability to work independently or cooperatively in a team
- Motivates the people for achieving the positions and acted as a performance appraiser.
- Possess excellent e-mail communication skills
- Analyzed, Architect, designed and developed Visual Studio.NET applications within a given period of time
- Having strong knowledge and experience in Supervised, Unsupervised, Re-enforcement Learning, NLP and Neural Network.
- Having a strong experience in Azure, AWS and Deployment on DevOps automated deployment.
- Skilled in AI/ML, RAG, LangChain, Vector Databases, Prompt Engineering, NLP, and automation for scalable solutions.

EDUCATIONAL QUALIFICATIONS

- MCA – master's in computer science (IT) in Jain University

CERTIFICATIONS

- Azure Fundamentals Certification : <https://learn.microsoft.com/api/credentials/share/en-us/KurmaRao-0676/5CB8629F0C288994?sharingId=90E9B4AFB51DA7D4>
- Mortgage Origination for Technology Professionals, Bank of America Learning and Leadership Development

TECHNICAL SKILLS

Web Technologies	.NET Core, Microservice, ASP.NET, ASP.NET, MVC, HTML 4.0, LINQ to SQL, DHTML, CSS, JQuery, JavaScript, J SON, Ajax, Angular, WEB API, MSMQ
Programming Languages	C, C++, C# .NET, .NET CORE, VBA, JAVA
.Net Frameworks	.Net 4.0 – 4.6, .NET Core Latest, Kafka, RabbitMq, NServiceBus, Quartz, RedisCache, Graph Api, R Programming, AI
RDBMS	SQL Server 2008 and 2014, Oracle 11G
Web Servers	Internet Information Server, IIS 7.0, PCF, Azure, And AWS

ORM Tools	Entity Framework 6.0
IDE	Visual Studio 2010 & 2012, 2015 2019 & 2022, Visual Studio Code
Version Control	TFS, GIT Lab, Bit Bucket
Cloud	PCF, MS Azure and AWS, DevOps

PROJECT EXPERIENCE

Ernst & Young LLP., Bangalore

August'18
Till

Designation: Manager

1. Project: DSA (Dell Sales Application)

August'20 to till

Client: DELL

Role: Senior Consultant Role

Description: I have been a part of DSA (Dell Sales Application). It is an E-Commerce application, build upon various microservices and hosted in Cloud with multiple distributed microservices, Micro frontend and technologies across globe all most all the regions, Customer order dell products go through all the phase of DSA life cycle include supply chain and till reaching to customer.

- Integrating nserviceBus, Rmq, Kafka, Graph api -Azure, Quartz and Angular to micro services.
- Supporting E2E Production deployments and coordinating respective clients.
- Writing unit test cases using xunit, AutoFixtures and Moq.
- Understanding and analyzing existing applications by participating in discovery calls, application development stages.
- Fixing defects and testing them in non-prod environments and then releases to prod. Maintain and make minor enhancements on existing applications; write and test program code to extend system functionality.
- As part of Agile, involve in the story discussion, spring plan, involve in defect discussion and daily standups.
- In Purchase Order Management (POM) Responsible for managing a team of 7-9 developers and acted as a scrum master in project release activities.

Environment: .NET Core, Microservices, MongoDB, Sql Server, Angular 16.0, RMQ, NserviceBus, Kafta, Quartz, Graph Api, MS Azure, Radis Cache, PCF, Python, SonarQuebe, CheckMarx, SecurityScan and GIT Lab.

2. Project: DELL CART, QUOTE and ORDER(DCQO)

August
to Aug
2020

Client: DELL

Role: Senior Software Engineer

Description: I have been a part of DCQO (Dell Cart Quote and Order Services). Client is currently managing the version 2 and 3 Cart and Quote systems used at Dell. Below is our leadership team, if you need to reach anyone regarding DCQO, GCM Cart, DCP Quote or Order API. Dell IT is located in three regions: the US, India and Malaysia. DCQO (Dell Cart Quote and Order) deals with the ecommerce application www.dell.com ecommerce.

Basically, it is divided into Off-line and Online sales, Quote is for Off-line Sales, Cart is for Online Sales and Order (Sales Order) is for Payment and Shipment. GCM (Global Commerce) and DCP (Dell commerce Product) were previous versions of DCQO. Responsibilities:

- Design Develop and Writing routes and handler's to micro services.
- Supporting Production deployments and coordinating respective clients.
- Understanding and analyzing existing applications by participating in discovery calls, application development stages.
- Design and Developing Integration test suits.
- Conducting daily SCRUM meetings, preparing Scope and Risk analysis, preparing WSR, WBS and SRS, update query log.
- Responsible for managing a team of 7-9 developers and acted as a scrum master in project release activities.

- Understanding and analyzing existing applications by participating in discovery calls, application development stages.
- Microservice Applications are Quote, Gii Quote Gateway, OpenBasketGateway, Cart, SalesOrder, Contact Service, Splitting Service, ItemService, Snapshot service, GCM Cart, GCM Quote etc.

Environment: .NET Core 3.1, Web API, .NET Framework 4.0, Microservices, WCF Services, MongoDB, TFS, GIT Lab, PCF, TDD, BDD, POSTMAN, SOAPUI, FIDDLER

Synechron Technologies Pvt. Ltd., Bangalore

May'16 to August'18

Designation: Tech Lead

1. Project: Global Market Portal

May'16 to August'18

Client: Jefferies Investment Banking LLC Role:

SR Developer

Description: Client currently has an internally developed research portal (Global Markets Portal, a.k.a. GMP), which is used by research analysts at Jefferies to author, manage and distribute research content based on a subscription module. A third-party tool from Blue Matrix is used for authoring research content using pre-existing word templates. Blue matrix is also utilized for content management as well as for distribution, and produces various research readership statistics for internal analytics. The current BlueMatrix platform creates the content in PDF format; however, BlueMatrix is upgrading its platform to provide rich content in HTML5 format.

Team Size: 7

Responsibilities:

- Involved in all phases of the life cycle of the project including requirement study, design, migration, and deployment and testing.
- Involved in Architecture Designing of a for all migrated application solutions.
- Design from written specifications and develop software applications using standard software development tools and programming languages applicable to the platform being used.
- Maintain and make minor enhancements on existing applications; write and test program code to extend system functionality.
- Conducting daily SCRUM meetings, preparing Scope and Risk analysis, preparing WSR, WBS and SRS, update query log.
- Responsible for managing a team of 7-9 developers and acted as a scrum master in project release activities.
- Understanding and analyzing existing applications by participating in discovery calls, application development stages.
- Technically architecting applications for Azure migration and documenting them for application team review.
- Included in developing the new application development for Migration with Angular, WEB API services and SQL Server.
- Creating Automated Dashboards, reports using excel vba, quickSense, Tablue, Crystal Reports, R.
- Included in developing new Micro services in Azure functions for schedulers.

Environment: ASP.NET MVC 4.0, WCF, WEB API, Entity Framework, MS SQL Server 2008, .NET Framework 4.0, Extension JS, VBA, Angular, ReactJS, Hadoop, Kafka, Oozy, AWS, Python, Data Analysis, creating Data Models with AI

ASAP Info Systems Pvt. Ltd., Hyderabad

Feb'16 to Apr'16

Designation: Senior Software Engineer

1. Project: App-V Client Deployment Tool

Feb'16 to Apr'16

Client: Tech Mahindra India Pvt. Ltd. (End Client: Microsoft India Pvt. Ltd.) Role:

SR Developer

Description: This tool is designed and developed to add, publish, and unpublished sequenced package (.appv) automatically by passing values in the WinForms user interface for App-V 5.0 and 5.1 through passing CMDLETS for enable package scripts, App-V file path, deployment configuration file, application name, and publish and unpublished the App-V client package.

Team Size: 3

Responsibilities:

- Analyzed and assessed client requirements for each project.
- Developed and implemented a defect tracking system.
- Tested system applications to identify issues.

- Administered change requests in a timely manner

Environment: C# WinForms, Windows PowerShell, App-V, Azure, Data Analysis

Prime Access Technologies Pvt. Ltd., Hyderabad

Mar'15 to Dec'15

Designation: Senior Software Engineer

Project: Dropbox

Client: Tech Mahindra India Pvt. Ltd. (Morgan Stanley LLC) Role: SR

Developer

Description: This portal is designed to inject the new report or existing report into Schedule Manager. It scans XML files, which contains all reports attributes placed by the different functional area clients. Any mismatch in XML nodes to access table data sends the status as good and bad to the user. Team Size: 3

Responsibilities:

- Analyzed existing code in office application, and drew flow charts
 - Prepared remediation document for daily tested template organize in the Hyper-V Machine
 - Responsible for drawing flowcharts and the architecture planning for the project
 - Enhanced, modified, and debugged existing reports as per the client requirement
 - Worked on daily, weekly, monthly, and ad hoc reports
 - Discussed all pros and cons of the project in daily client call Environment: SQL Server, C#, ASP.NET MVC, AngularJS, VBA, Data Analysis
-

Bank of America Continuum Solutions Pvt. Ltd., Hyderabad

Mar'08 to Aug'14

1. Project: TWA Application

Description: This project is a complete solution to design and development of Title Workflow Application (TWA) for the LandSafe process in the Home Loans department that included different sub processes such as LandSafe Opener, LandSafe Updates, and CA-TSG. Uploaded the title documents from state side team/ customer on the TWA on which this process works on and included keying the legal description in the TWA, updating the borrower information such as judgments, lien, taxes documents, and quality checking, and developing applications architecture at session, application, and admin levels.

Responsibilities :

- Involved in Project requirement gathering, analysis, designing and implementation of the project
- Involved in design, develop visual studio workflows using Windows Workflow foundation.
- Involved in the Go Live and Post Production support activities.
- Used TFS for project management & version control.
- Analysis operational data and creating reports excel & vba, quickView, Tablue on daily, weekly and ad hoc reports.
- Data scraping / data crawling in AS400, other web applications.

Environment: C#, ASP.NET MVC, WCF, MS SQL Server, HTML5, JavaScript, jQuery, AS400, Excel VBA, Reporting, Data Analysis, Data scrapping, OCR, AI
